

Hello, we are a research team of Central South University and so sorry to disturb you. We are conducting a research on GitHub project recommendation. We want to know the information that developers care when browsing repositories. We hope you can answer several questions we asked, which is very useful for our research. Two minutes is enough to finish this survey. Thank you very much!

You can answer directly under each question, and reply to this email, we will count your answers in our results.

-----

Questions:

1. Do you use GitHub in your study or work? (Yes/No)

If your answer is No, please tell us why you don't use GitHub and you don't need to answer the rest of the questions.

2. How many years have you used GitHub?

- 1 year
- 2 years
- 3 years
- 4 years
- 5 years
- More than 5 years

3. Which behaviors in GitHub can represent your programming preferences?

- Create
- Follow
- Fork
- Issue
- Pull Request
- Star

Please choose the options that can represent your programming preference and if there is any other answer, please write down to let us know.

4. What will you focus on to decide whether star or fork a repository?

- About :In old version, it's called "Description", it is a brief introduction to the repository
- Source Code
- Programming Language
- Readme
- Number of Fork
- Number of Issue
- Number of Pull Request
- Number of Star

Please choose the options that can represent your programming preference and if there is any other information you do care, please write down to let us know.

5. Do you want other developers to participate in your open source repository and contribute code to the repository? (Yes/No)

6. Are other developers joining your open source repository and submitting Pull Requests for your repository? (Yes/No)
